## PROFESSIONAL SUMMARY

---

I'm a Software Engineer driven by curiosity and a desire to learn. I enjoy tackling new challenges and turning them into practical, user-focused solutions. Whether I'm helping build intuitive interfaces or learning how to optimize performance, I approach each project with a problem-solving mindset and an eagerness to grow. I'm excited to collaborate and help turn ideas into digital experiences that exceed expectations.

## PROJECTS

---

### Travel & Tours

This is a freelance capstone project for a travel and tours company, aimed at automating their booking system, creating customizable travel packages, offering seasonal promotions, and tracking both income and overall bookings.

**Technology Used:** Vue JS, Laravel, MySQL, Tailwind CSS

### JMOS

A full-stack e-commerce application designed to deliver a high-end, "industrial executive" shopping experience. Built with a focus on performance and modern aesthetics, the platform features a custom-built Laravel API backend and a dynamic React frontend.

**Technology Used:** React 18, TypeScript, Vite, Tailwind CSS, Laravel 11 (PHP), MySQL
